[Portfolio](#)

PROFESSIONAL SUMMARY

Data Science and Computer Vision professional with internship experience in Machine Learning and project experience in Image Classification using CNN and Transfer Learning. Proficient in Python, TensorFlow, PyTorch, and OpenCV, with exposure to Deep Learning, Data Preprocessing, and Model Deployment. Seeking a role as a Computer Vision Engineer.

SKILLS

Programming Languages: Python, SQL, HTML, CSS

Deep Learning Frameworks: TensorFlow, Keras, PyTorch, Flask

Computer Vision & Image Libraries: OpenCV, Matplotlib, PIL

ML & DL Concepts: CNN, Transfer Learning, Image Classification, Model Evaluation, Feature Engineering.

Data Libraries: Pandas, NumPy, Scikit-learn

Databases: MySQL

Tools & Platforms: GitHub, VS Code, Google Colab, Jupyter Notebook

Core Competencies: Data Preprocessing, EDA, Data Visualization, Model Deployment

EXPERIENCE

SkylX Technologies Private Limited

March 2026 – Present

Data Science Intern -Bengaluru

- Currently undergoing professional training in Data Science and Machine Learning.
- Learning Python, NumPy, Pandas, SQL, Statistics, Machine Learning, Data Visualization, and Power BI.
- Working on practical projects involving data analysis, machine learning models, and predictive analytics.

Starvic Edu Tech LLP

Nov 2024 – Jan 2025

Data Science Intern - Hubballi

- Built an intelligent, real-time system to predict abalone age using supervised Machine Learning.
- Processed and analyzed a dataset of 4,177+ records using Python and Pandas, applying Data Preprocessing and Feature Engineering to prepare inputs for model training.
- Trained and evaluated multiple regression models, conducting Model Evaluation and achieving an R^2 score of 0.57 on age prediction.
- Developed and deployed a Gradio-based web interface for real-time predictions – hands-on Model Deployment experience.

PROJECTS

Mango Tree Disease Identification | Computer Vision, Keras/TensorFlow, OpenCV, PIL, Flask

- Addressed delayed and inaccurate manual identification of mango tree diseases using Deep Learning and Computer Vision.
- Built a DenseNet201-based Transfer Learning model (Keras/TensorFlow) to perform Image Classification across 10 distinct disease categories.
- Used OpenCV and PIL for image preprocessing, cleaning, and Image Augmentation to improve data quality and model generalization.
- Achieved 98.7% classification accuracy; deployed the trained model as a web application using Flask and delivered actionable disease guidance alongside each prediction.
- Published findings as an IEEE research paper.

PUBLICATION

- A Comparative Deep Learning Framework for Mango Tree Disease Detection Using CNN-Based Transfer Learning and Image Augmentation Techniques - IEEE NKCon 2025, Paper ID: 391, <https://ieeexplore.ieee.org/document/11345804>

CERTIFICATIONS

- Google Cloud Computing Foundations — NPTEL/SWAYAM, IIT Kharagpur (12-week course)

EDUCATION

KLE Institute of Technology, Hubballi

Master of Computer Applications

2023-2025

CGPA: 8.17
